Agilent 1290 Infinity II Bio LC System

The 1290 Infinity II Bio LC System provides all the advantages of a 1300-bar 1290 Infinity II LC, plus a biocompatible flow path for ultrahigh performance analysis of critical quality attributes and straightforward method transfer in biopharma.

BIO

Biocompatible valve automation

Benefit from high throughput, enhanced system care, and less manual interaction.

Built-in sampling versatility

Gain high adaptability and flexibility in injection volumes and sample containers.

Multiple detection options

Use sensitive optical detection (DAD, VWD, FLD, Bio-MDS) while maintaining sample integrity.

Versatile column handling

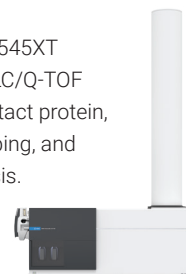

Apply high adaptability and temperature stability to the most complex analyses.

Reliable solvent delivery

Perform biocompatible, high-pressure gradient mixing for ultrahigh performance.

Expand your scope with LC/MS

The Agilent 6545XT AdvanceBio LC/Q-TOF automates intact protein, peptide mapping, and glycan analysis.

Advanced column performance

Agilent AdvanceBio columns, including new, bio-inert versions, are optimized to suit your needs and instrument capabilities.
